

## Top View

## Side View

- Natural Burmese teak wood – fully sanded and uncoated natural appearance.
- Wall mounted - mount into wood studs / wood backing only.
- #304 stainless steel wall brackets lock securely into place when the seat is lifted.
- Wall brackets are 16" centerline to centerline.
- Seat remains in raised position until you fold it down.
- Rounded edges on seat provide additional comfort.
- Weight Capacity: 300 lbs. (when properly installed into wood backing)
- Suggested mounting height ranges from 17" to 19" above the floor.
- Natural teak wood can have a variation of darker and lighter tone wood salts, as each log varies in color.
- Installation: Must mount into wood studs or wood backing - not recommended for hollow walls. Mounting points are 16" centerline to centerline. Use an extended screwdriver / bit to extend each screw through the bracket slotting in order to reach each screw hole on the mounting surface.
